Flora and Fauna

OK

I am tired

Question did I (We) spend to much time in this war

Would we have been better off just staying quite and waiting for the chips to fall and just come out when the dust settles

people see their families getting harmed and their neighbors being buried

and just think there is a

savior

Should we Just be dropping them at the door and once the pile of bodies gets high enough would they see it as a place to stay away from

if we never had any kind of weapons period

would not the flora and fauna be the controller of life

Harmony

To Bad our Maker didn't think of creating a special Garden for us to live in

That's Right He Did

And what happened

He Is

Most High
